

2016 Annual Report

Building Business Value.

OUR VISION

CII envisions a construction industry that builds predictable value for society and stakeholders.

OUR MISSION

The mission of CII is to inspire owners, contractors/suppliers, and academia to collaborate through research to produce best practices and implementation resources, creating innovative solutions that tangibly improve safety and capital efficiency.

FROM OUR DIRECTOR

Introducing the New CII.

Dear Valued CII Members:

Our 2016 was a busy year. As you know, the world looks to CII to advance the capital projects business. Since its founding in 1983, the Institute has developed a global reputation for making the industry's projects safer, more productive, and increasingly predictable. But a great reputation comes with the responsibility and obligation to continually do more. CII made a number of significant changes in 2016 to accelerate the pace of industry advancement and dramatically increase the scale of business results possible from capital projects.

This year's Annual Report outlines these changes and the impact that they're already having on CII's members and the industry at large.

34
YEARS

7
COUNTRIES

130+
MEMBERS

Turning ideas into action.

To support the work of the **Sector Committees** and promote collaboration, CII created four repurposed functional committees, known as **Standing Committees**, along with **Membership and Communications**. At their core, these committees are designed to work across all sectors with a focus on the following areas:

Funded Studies

to help choose research topics

Implementation

to help members use this research, which includes overseeing a new Registered Advisor Program (RAP) of select independent consultants who can become certified to implement CII tools, methods, and change programs

Performance Assessment

to determine how to measure success

Professional Development

to train people to implement the research successfully

Membership and Communications

to promote growth and share knowledge and successes across all sectors

CII'S BOLD TRANSFORMATION

In April, CII's Board of Advisors approved a new governance structure featuring **five new sector-specific committees, four repurposed functional committees, and three leadership committees**. Although the total number of committees has remained the same, CII is now able to create research and products tailored to the business needs of each industry sector while positioning the industry for the future. The Institute's forward-looking, "overarching" research and development program is now designed to investigate major areas with breakthrough potential as identified by the Board of Advisors and the leadership committees. This helps move CII beyond incremental gains to achieve results that were previously unthinkable.

RENEWED FOCUS ON IMPLEMENTATION

After several years of development, CII launched the new Knowledge Base

at the Annual Conference in August. **The Knowledge Base is the foundation for the industry's future — it leverages three decades of CII research in a user-friendly, online format complete with the key findings and resources members need to quickly understand and assimilate learning.** However, unless the findings are put into action, CII's research risks becoming just another report on a website. This is the Institute's largest challenge – to leverage our research and development (R&D) activities to actually deliver measurable business results (as opposed to driving awareness and understanding). To meet this challenge, CII is rethinking how our members should use the human, financial, and technological resources at their disposal. Our Implementation, Professional Development, and Performance Assessment Committees now work in parallel with Research Teams so that members have all the resources they need to deliver improved business results through the capital projects they plan and execute.

INTERESTING TRENDS

The realms of corporate finance and capital projects are on a collision course that is spawning new organizations and different forms of value creation. Developers, commonly found only in commercial construction, have migrated to all sectors of the capital projects business. Project completion is no longer a technical definition, but often a balance sheet algorithm as well. CII's members are not immune to these changes.

Fortunately, CII is able to stay ahead of these and other trends by conducting the research and development that positions capital projects for the future. In 2016, the Institute began casting a wider net to gather the best minds from all facets of academia and business to ensure that all issues and aspects are fully considered in the creation of solutions. Our committees were challenged to do the extraordinary and move beyond ordinary topics to seize on bold initiatives that will provide enhanced business value at both sector and industry levels. CII's committees are rising to the challenge. The overall number of volunteers involved in CII activities is up. The energy level of our members is up. It's apparent: CII's leadership is creating what's next in capital projects.

YOUR INSTITUTE

2016 marked the first 12 months of our 18-month evolution to create a revolution in the capital projects business. The transition is going well.

Besides changes to CII's committee structure and a laser-focus on business results, the Institute has also strengthened and expanded our partnerships around the world. Currently, CII has affiliates for its R&D efforts in Canada, Norway, Saudi Arabia, South Africa, Singapore and South Korea, and we continue to look for opportunities in new regions as well. Our global reach affords CII the benefits of expanded collaboration with additional universities and organizations that offer different and new perspectives. Ultimately, though, the future of our industry is dependent on you. CII needs you to invite colleagues from other departments in your company and colleagues from different organizations to participate in CII activities. Doing so gives the Institute the intellectual merit it needs to create the broad impact that you desire. It also allows us to honor the legacy of our 2016 Chairman Mike Elliott, who recently passed, by advancing the work of the Institute that he so ardently supported.

CURRENT CHALLENGES

98%

80%

BRENDAN BECHTEL
CII, AC 2016

A BRIGHT OUTLOOK

CII was fortunate to have Brendan Bechtel keynote our Annual Conference in August. While he shared his optimism for our industry's future, he also highlighted symptoms of its current state: 98% of megaprojects (over \$1 billion) are considered failures, exhibiting average cost overruns of 80% and average schedule losses of 20 months. We can do better. While I'm confident that CII can create the path forward, I'm also committed to the idea that most of the solutions for our industry's future won't resemble the strategies of the past. Precisely because the world looks to CII to advance the capital projects business, our collective work continues to be incredibly important. Important to the people who (knowingly or not) depend on our industry every moment of every day. We build the hospitals that care for people, facilities that manufacture medicines and products, projects that create energy, and infrastructure to transport everything to where it's needed. Capital projects are the vehicle that improves people's standard of living. CII is the engine that makes capital projects better!

CII ADVANTAGE

Breaking New Ground with Bold Ideas.

Sector Research Initiatives

Facilities and Healthcare

Beyond capital cost, how does the built environment impact the business case for a project?

BUSINESS IMPERATIVES

Renovation/Revamping of Existing Facilities

Portfolio Management

Technology Impacts to Construction Management (ex. BIM)

Life Cycle Costs

Power, Utilities and Infrastructure

What is the regulatory impact on projects for their full life cycle?

How can we improve the materials flow and visibility of the supply chain?

BUSINESS IMPERATIVES

System Reliability

Capital Efficiency

Customer Affordability

Government Regulations

Siting and Location of Projects Environmentally Controlled

Cannot Set Own Prices

CII's next-generation strategy includes expanding membership into more diverse areas within the capital projects industry. In 2016, we identified five industry sectors and created committees to represent each sector. Each committee develops policy and programs, and oversees research initiatives driven by the key business imperatives for their sectors.

Our goal is to enable more and different kinds of companies to have a voice – to ask the kinds of questions that are most relevant to their businesses – and produce research that can be applied directly to their capital projects. We see opportunities for more diverse thinking and even greater innovation that will increase the value CII delivers to its members.

We also see opportunities deliver more robust research results more quickly. To keep work focused and productive, each sector committee will conduct no more than two research initiatives at a time.

Every initiative will be fully formed, which means the results will include educational products and services, such as videos or events, and key performance indicators. CII members also will have access to Registered Advisors who are select independent consultants certified to implement CII tools, methods, and change programs. In other words, members will gain the tools and resources they need to apply the research successfully.

Manufacturing and Life Sciences

How can the Manufacturing and Life Sciences sector develop a methodology for generalizing a long lead facility with an undefined manufacturing process?

How can we create a more applicable Project Definition Rating Index for the Manufacturing and Life Sciences sector?

BUSINESS IMPERATIVES

Improve Speed to Market

Labor Availability

Reduce Costs

Improve Capital Productivity

Downstream and Chemicals

How do we double productivity?

How can we create a construction readiness assessment?

BUSINESS IMPERATIVES

Health and Safety Environment

Predictability

Transparency

Competitiveness

Improved Delivery Process

Flexibility (Agility, Speed)

Upstream, Midstream and Mining

How can we achieve a higher level of facility design standardization in the Upstream, Midstream and Mining sector?

How can we best use CII's 17 best practices?

BUSINESS IMPERATIVES

Capital Effectiveness

Performance Predictability

Performance Agility

Driving Change.

Honoring Outstanding Leadership and Commitment

CARROLL H. DUNN
AWARD OF EXCELLENCE

Bernard Amadei

This year's honoree, Dr. Bernard Amadei, Professor of Civil Engineering at the University of Colorado Boulder, is changing the world through engineering. His highly distinguished career of teaching and global industry

leadership continues to reflect innovative thinking, creative collaboration and a call to the engineering community to contribute to the building of a more sustainable, stable and equitable world. As the founder of Engineers Without Borders – USA and co-founder of Engineers Without Borders – International, Amadei believes that global citizen engineers are called to operate in a multi-cultural world in which they deliver solutions that are done right from a technical point of view, are the right solutions for the planet and its people, and are developed for the right reasons. The Engineers Without Borders (EWB) network transforms lives and communities through engineering projects designed to empower communities to meet their basic human needs and equip leaders to solve the world's most pressing challenges. His ongoing work continues to challenge the engineering and construction industry and push boundaries to improve our world.

ABOUT THE AWARD

As one of our industry's most prestigious recognitions, this award was named in honor of Carroll H. Dunn, Project Director of the Construction Industry Cost Effectiveness Project, which formed the foundation of CII, to honor an individual for significant achievements in improving the engineering and construction industry.

RICHARD L. TUCKER
LEADERSHIP AND SERVICE AWARD

Jerry Eyink

For more than 30 years, Jerry Eyink has been a devoted and active member of CII whose outstanding involvement and volunteer efforts include a number of leadership roles. Eyink served on CII's Executive Committee from

2005-2007 and the Executive Advisory Council in 2009. In 2008, he received CII's Distinguished Service Award for his leadership and demonstrated commitment to improving the cost effectiveness of the capital project life cycle. Throughout his decades of service, he has also served on CII's Board of Advisors, Strategic Planning Committee, Implementation Strategy Committee, Education Committees, Annual Conference Committee, Knowledge Management Committee and Research Teams. Eyink is an instructor for CII's Executive Leadership Program, and he most recently helped manage a team of more than 200 volunteers to launch CII's new Knowledge Base, which has transformed access to three decades of industry knowledge. For Eyink, this prestigious "Tucker Award" holds particular meaning, as Richard Tucker was the person who inspired Eyink in 1985 to participate in CII.

ABOUT THE AWARD

Named for Dr. Richard L. Tucker, who led the founding of CII in 1983, this award recognizes individuals who have made a significant contribution to CII's mission and success.

Collaboration That Delivers Business Results.

CII has long understood the benefit of teamwork. As part of CII's transformation, its work with Process Industry Practices (PIP) and Fiatech to deliver business results from capital projects has become more important than ever.

For more than two decades, Process Industry Practices (PIP) has been developing and implementing common industry practices for facility design, procurement, construction, operations and maintenance that help reduce a facility's total cost of ownership. It is a self-funded consortium of process industry owners and engineering construction contractors organized under the Institute inside the Cockrell School of Engineering at The University of Texas at Austin. More than 300 members and volunteers worldwide collaborate to harmonize internal company standards and best practices into industry-wide PIP Practices for members to use. Today, there are more than 600 PIP Practices in 12 engineering disciplines.

CII established Fiatech more than 15 years ago to identify and develop new technologies to enable capital project efficiencies. Because technology today has become so integral to all areas of business, Fiatech and CII decided in 2016 to more closely integrate their operations. Fiatech will continue to advance technology research and adoption as part of the larger CII strategic effort to drive business results.

**INDEPENDENT ACCOUNTANTS' REPORT
ON APPLYING AGREED-UPON PROCEDURES**

To the Management and Board of Advisors
Construction Industry Institute
Cockrell School of Engineering
The University of Texas at Austin

We have performed the procedures enumerated below, which were agreed to by Construction Industry Institute (Institute) management, on Membership Dues and Available Funds reported in the Institute's 2016 financial statement to be included in its annual report. The Institute's management is responsible for Membership Dues and Available Funds reported in the 2016 financial statement. The sufficiency of these procedures is solely the responsibility of the Institute's management. Consequently, we make no representation regarding the sufficiency of the procedures described below either for the purpose for which this report has been requested or for any other purpose.

Our procedures and associated findings are as follows:

- We obtained from management the 2016 financial statement to be included in the annual report.
- We obtained from management financial reports from *DEFINE, The University of Texas at Austin's software that accounts for the Institute's financial transactions.
- We have provided below a reconciliation of the Institute's "membership dues" revenues from balances reported in *DEFINE to the 2016 financial statement.
- We have provided below a reconciliation of the Institute's ending "available funds" balance from *DEFINE to the 2016 financial statement.

Reconciliation of Membership Dues per *DEFINE to the 2016 financial statement:

Membership payments received per *DEFINE:

2016 member dues payments received in 2016	\$	3,450,218
2016 member dues payments received in 2015		514,805
Total 2016 membership payments received per *DEFINE		<u>3,965,023</u>

Reconciling items:

Add: 2016 member dues accrued (receivable)	752,400
Add: 2016 member dues recognized for in-kind contributions	39,600
Add: Miscellaneous reconciling items	897
Less: Reversal of 2015 accruals for dropped memberships	<u>(59,400)</u>

Membership dues reported in Annual Report	\$	<u><u>4,698,520</u></u>
---	----	-------------------------

Reconciliation of Available Funds per *DEFINE to the 2016 financial statement:

Free Balances per *DEFINE:	\$ 1,244,362
Adjustments to *DEFINE balances:	
Add: Encumbered funds (not yet spent)	1,907,211
Add: UT overhead charged, but not yet incurred	72,518
Add: Contract balances in excess of payments received	126,516
Add: Posting error	33,573
Less: UT's overhead portion included in Free Balance	(216,207)
Less: PIP funds held in CII account	(1,067,907)
Adjusted Free Balances per *DEFINE:	2,100,066
Reconciling items:	
Add: 2016 membership dues revenues accrued (unpaid)	752,400
Add: 2015 membership dues revenues accrued (unpaid)	9,920
Add: 2017 prepaid rent (Jan, Feb)	36,990
Add: 2017 prepaid Executive Leadership Program expenses	27,356
Add: 2017 prepaid Association Tech Solution expense	30,636
Add: Additional CII funds available in PIP account	26,877
Add: Annual report overstated by in-kind membership entry	39,600
Less: 2017 membership dues revenues deferred	(435,600)
Less: 2017 Executive Leadership Program revenues deferred	(296,600)
Less: 2016 travel stipends accrued (unpaid)	(107,250)
Less: 2016 deposits not reflected in annual report	(77,905)
Less: Miscellaneous other identified reconciling items	(28,122)
Unreconciled difference	(96,478)
Ending Available Funds Balance per Annual Report	\$ 1,981,890

This agreed-upon procedures engagement was conducted in accordance with attestation standards established by the American Institute of Certified Public Accountants. We were not engaged to and did not conduct an audit or review, the objective of which would be the expression of an opinion or conclusion, respectively, on Membership Dues and Available Funds reported in the Institute's 2016 financial statement. Accordingly, we do not express such an opinion or conclusion. Had we performed additional procedures, other matters might have come to our attention that would have been reported to you.

This report is intended solely for the information and use of Management and the Board of Advisors of the Institute and is not intended to be and should not be used by anyone other than these specified parties.

Austin, Texas; March 15, 2017

Sharing Knowledge to Create 'What's Next'

CII is a learning organization with a wealth of knowledge and information. We offer opportunities throughout the year for meaningful collaboration – from conferences to technology showcases to our Annual Conference – that ultimately improve safety and capital efficiency.

CII's Annual Conference 2016 in National Harbor, Md., attracted about 600 industry leaders and featured key research presentations, breakout sessions, awards presentations and dynamic keynote speakers. From the top: Yangmin Shi, Texas A&M, explains his poster project to a conference attendee; 2016 CII Chair Mike Elliott, Phillips 66, and 2015 CII Chair Jim Backes, Hargrove EPC; keynote speaker Brenden Bechtel, CEO of Bechtel Company; CII 2016 Annual Conference Chair Ann Marie Sweet-Abshire, US Veterans Affairs, presenting Georgia Tech's Pardis Pishdad-Bozorgi with CII's Outstanding Researcher Award.

ABOUT US

The Construction Industry Institute, based at The University of Texas at Austin, is a consortium of more than 130 leading owner, engineering-contractor, and supplier firms from both the public and private arenas.

These organizations have joined together to enhance the business effectiveness and sustainability of the capital facility life cycle through CII research, related initiatives, and industry alliances. A learning organization with a wealth of knowledge and information, CII is unique in the engineering and construction industry.
