The Research Question

How can higher levels of facility design standardization be achieved?

The Research Project

Create a matrix encompassing a massive aggregation of existing data on life cycle cost estimation. Cross reference the attributes of each, validate these and identify any gaps that exist.

The Healthcare Benchmarking Program

A collaborative effort that allows healthcare owners, contractors, and architects to compare several aspects of their projects to other companies’ projects.

"Entering project data into the benchmarking program is pretty easy once you’ve done it a few times. What used to take me many days only takes me three hours now because I’ve learned when, where, and how to gather and enter project data."
